

ASSETT SME: Software Modernization Engineering

Will your legacy software continue to support your business growth?

Software modernization is a key element in planning for the future growth of your business. As you look forward to expanding your business base, one of the most frequently overlooked questions is “*will your business software support your planned growth?*”

Why is software modernization needed?

- Company-specific application, no off-the shelf software can replace
- Outdated and inefficient applications
- Legacy applications with unsupported technology (operating systems, device-specific interfaces)
- Lack of hardware or software support
- Insecure or security-vulnerable applications

What can SME do for you?

- SME will use the right tools for your job— a “one-size fits all” simply doesn’t.
- Reduce your Total Cost of Ownership (TCO)
- Maintain your business rules
- Increase the lifespan of your mission-critical applications
- Reduce business risk by providing a timely, cost-effective and high-quality approach to modernization

SME is a leader in cost-effective software modernization

- Positive Return on Investment (ROI) within 12 months
- 30% Reduction in Support Software maintenance costs

SME provides a full service capability

- A structured and customized System Level approach to meet the needs of your business
- Software re-factoring and modernization, not just a language change
- Ease of adaptability, adding features, changing platforms, evolving delivery methods, including “cloud” –based applications
- Installation and support
- Increased device and hardware compatibility

SME Provides Multiple Delivery Modes

- Delivery of updated software executing on existing hardware
- Delivery of updated software executing on existing hardware with software support
- Delivery of updated software executing on updated hardware with software support
- Updated software available via Web Service

When your life or livelihood depends on your applications, data and architecture, turn to the company the Navy turns to for innovative technology solutions.
